Letter of Acceptance

Details of accepted manuscript:

Paper ID – ICSCNA_554

Title – AN AI-DRIVEN AUTONOMOUS DEVOPS FRAMEWORK FOR INTELLIGENT CLOUD INFRASTRUCTURE PROVISIONING AND APPLICATION DEPLOYMENT

Author(s) – P.Jyothi, G. Vibhas Naidu, Jagadeeswar Jonnadula, K. Parvez Alam, Y. Uday Bhaskar Reddy

---

Decision: Acceptance with Major Revision

Herewith, the conference committee of the International Conference on Sustainable Communication Networks and Applications [ICSCNA 2026] is pleased to inform you that the peer reviewed research paper entitled ***"AN AI-DRIVEN AUTONOMOUS DEVOPS FRAMEWORK FOR INTELLIGENT CLOUD INFRASTRUCTURE PROVISIONING AND APPLICATION DEPLOYMENT"*** has been accepted for oral presentation as well as it will be recommended in ICSCNA Conference Proceedings. ICSCNA will be held on **04-06, November 2026**, in Bharath Niketan Engineering College, Theni, Tamil Nadu, India. ICSCNA encourages only the active participation of highly qualified delegates to bring you various innovative research ideas.

We congratulate you on being successfully selected for the presentation of your research work in our esteemed conference.

Thank you

Yours Sincerely,

Dr K. Pounraj,
Conference Chair – ICSCNA 2026

Certificate ID – Y8E7S89O83

Review Comments

Decision: Acceptance with Major Revision

Title – ***AN AI-DRIVEN AUTONOMOUS DEVOPS FRAMEWORK FOR INTELLIGENT CLOUD INFRASTRUCTURE PROVISIONING AND APPLICATION DEPLOYMENT***

Review Comments1 :

1. The review includes only 19 unique studies, which may not sufficiently represent recent advancements in autonomous DevOps.
2. The review does not explain the database search strategy, search keywords, or systematic inclusion and exclusion criteria.
3. The technical quality and reliability of the selected studies are not evaluated using a standard assessment method
4. The reported performance metrics are presented without a systematic analysis of differences in datasets, workloads, and experimental conditions.
5. Although security validation is discussed, the review lacks a detailed comparison of vulnerabilities, security controls, and failure risks across existing approaches.
6. Provide gaps between the keywords and introduction. Remove the informal words like"hoistic, tweaking".

Review Comments2 :

1. Verify the classification of papers [3], [4], [8], [12], [15], and [16] across Table I and the corresponding thematic discussion.
2. Resolve the abstract's count of 20 base-paper PDFs and 19 distinct studies with Table I's thematic grouping and caption.
3. Check the citation numbering for the AIOpsLab discussion on page 2 against the reference list and the corresponding study description.
4. Authors should replace informal first-person expressions and conversational wording with consistent academic phrasing.
5. Standardize the use of "DevOps," "AIOps," "Infrastructure-as-Code," and "root-cause analysis" across the manuscript.
